Carrier Clears the Air for  
Enhanced Comfort

# Things to Consider Before You Buy

## You Can Enjoy a Cleaner, Fresher Indoor Environment

Carrier specializes in creating a customized home comfort system tailored to your needs with our broad selection of residential heating and cooling products. To take your indoor comfort to an entirely new level, Carrier® Healthy Home Solutions offers a comprehensive family of products designed to clean and refresh the air inside your home. These products include:

- Air purifiers and cleaners
- UV germicidal lamps
- The Infinity® system
- Fresh air ventilators
- Humidifiers
- Carbon monoxide alarm

If you could examine the air inside your home, you might be surprised to find contaminants such as viruses, bacteria, mold spores, pollen and animal dander. In fact, indoor air can be up to five times more polluted than outdoor air. Carrier Healthy Home Solutions offers a variety of air purification and filtration products that fine tune your indoor environment by removing these pollutants from the air you breathe.

The Infinity® air purifier offers extremely high air filtration efficiency and patented germicidal technology so effective it even captures and kills airborne pathogens such as bacteria, viruses and mold spores. And, the Infinity air purifier is as convenient as it is powerful because no cleaning is required. Just periodically replace a removable cartridge.

Regular filter changes are important. Carrier high-efficiency filters feature a design that allows for easy removal and even easier replacement.

- Dirty filters restrict airflow through your heating and air conditioning system, causing the system to work harder and be less efficient in maintaining your indoor temperature settings.
- Clean filters help your system operate at its peak performance and efficiency levels, helping you keep your utility costs down.
- It is recommended that your Carrier high-efficiency filter be changed at least:
  - Once a year – for standard fan operation
  - Twice a year – for continuous fan operation

## Air Filtration Products

When your heating and air conditioning system is equipped with a Carrier® high-efficiency air filter, your indoor air is cleaned as it passes through the pleated media filter. The clean air is then circulated throughout your home.

## Infinity® Air Purifier

The Infinity air purifier is our premier air cleaning and purification solution with patented Captures & Kills™ technology. It provides the highest tested germicidal effectiveness with a 99% inactivation rate against selected viruses, bacteria and fungi. At MERV 15, it achieves the highest air cleaning efficiency of any Carrier model. The replaceable filter can provide several months of filtration. And, it's available in models compatible with your Carrier furnace or fan coil.

Independent lab testing on the Infinity air purifier technology has shown a 99% germicidal effectiveness (inactivation) within 24 hours for the following:

Viruses – Human influenza, common cold, avian influenza, wild type A influenza, measles, smallpox surrogate, and coronavirus (SARS)

Bacteria – Bacillus subtilis, Mycobacterium parafortuitum (tuberculosis surrogate), Staphylococcus aureus, Serratia marcescens, Pseudomonas aeruginosa, and Streptococcus (causes sore throat)

Fungi – Aspergillus versicolor

Fan Coil Model

## Performance™ Air Purifier

The Performance air purifier offers a competitively priced alternative with similar Captures & Kills purification capabilities. It provides a high rate of effectiveness against cold and flu viruses while filtering at an excellent MERV 13 efficiency. The replaceable filter provides several months of effectiveness. The Performance air purifier is also available for use with a Carrier furnace or fan coil.

Independent lab testing on the Performance air purifier technology has shown a 96% germicidal effectiveness (inactivation) within 24 hours for the following:

Viruses – Human influenza and common cold

Bacteria – Streptococcus (causes sore throat)

96%

Used with either furnaces or fan coils

### Limited Warranty

To the original owner, the Carrier Infinity air purifier and Performance air purifier are covered by a 10-year parts limited warranty upon timely registration. The limited warranty period is five years if not registered within 90 days of installation. Jurisdictions where warranty benefits cannot be conditioned on registration will receive the registered limited warranty. See warranty certificate at [carrier.com](http://carrier.com) for complete details and restrictions. Be sure to ask your Carrier dealer about labor warranties.

## Fresh Air Ventilators

Newer, more tightly constructed homes are designed to conserve energy. At the same time, they can trap airborne particles, gases, unpleasant odors, and moisture allowing them to re-circulate throughout your home.

Carrier® fresh air ventilators work behind the scenes to remove these pollutants and refresh your indoor environment while saving energy. It's kind of like opening all the windows without letting heated or cooled air escape.

**10**  
YEAR  
LIMITED  
WARRANTY

The Fresh Air Vent provides an alternative, economical solution to bring fresh air into your home. Although it doesn't have the heat exchange capabilities of an ERV or HRV, fresh air is introduced in a controlled way.

**5**  
YEAR  
LIMITED  
WARRANTY

- HRV or ERV?

- If you live in a colder climate with a longer heating season such as Canada or the northern United States, the HRV will provide the most comfort and efficiency.
- In the midwest and southern states, where humidity removal is needed for the incoming air, an ERV provides year-round efficiency.

## Ultraviolet Germicidal Lamps (UV Lights)

Mold spores, bacteria and fungi can invade the dark, damp surfaces of your cooling coil. Left unchecked, buildup of these contaminants can reduce system efficiency and release potentially harmful pollutants such as mold spores and unpleasant odors into the air you breathe.

As part of Carrier Healthy Home Solutions, the germicidal UV lamp bathes the cooling coil with intense UV-C light, helping to sterilize its surfaces while maximizing system efficiency and protecting the air you breathe.

- UV lights are mounted inside your system, near the indoor cooling coil, where fungus and microbes may grow and pollutants can collect.
- No cleaning is required. Simply replace the lamps once a year and you can continue to enjoy cleaner, healthier air and enhanced system efficiency.
- UV lights are designed to work in newer systems and can work in your current system as well. With a 10-year limited warranty, better air quality means reassurance like never before. The lamps are covered with a 90-day limited warranty.

**10**  
YEAR  
LIMITED  
WARRANTY

## Humidifiers

Overly dry air can cause itchy, cracked skin, dry nasal passages, annoying static shocks, and cracked woodwork. Adding a Carrier® humidifier can help alleviate these conditions.

In addition, more airborne moisture means less opportunity for dust and other irritants to circulate in the air that you breathe.

Carrier humidifiers can even help you save money on your energy bills since humidified air actually feels warmer than dry air – so your control can be set to a lower temperature.

Fan-Powered Humidifier

Steam Humidifier

Bypass Humidifier

- Performance, durability and warranty
  - Bypass and fan-powered models deliver water vapor quietly and efficiently into the duct. The water saver bypass model is 100% efficient in water usage. The steam model delivers high temperature water vapor into the duct with a unique dispersion tube.
  - On bypass and fan-powered models, the casing is designed to resist UV light damage and corrosion for long-lasting functionality. On the steam model, the cabinet is fabricated with heavy gauge metal and painted for resistance to corrosion.
  - All models are designed with easy access for replacement of the water panel or steam canister.
  - Carrier humidifiers include a 10-year limited warranty. See your Carrier dealer for more information.

## The Infinity® System

Carrier's Infinity system gives you ultimate control over temperature, humidity and airflow providing you the best in comfort and indoor air quality.

- The Infinity system delivers enhanced air cleaning capabilities with a nearly continuous flow of air through your system's filters. And, with our economical, multi-speed continuous fan, you can experience even greater air cleaning.
- True Sense™ dirty filter detection lets this system tell you exactly when your filters need to be cleaned or replaced. This feature greatly increases the likelihood that you will maintain optimum air cleaning performance.
- With Carrier's unique Ideal Humidity System® technology function, the Infinity system puts you in control of your humidity like never before, squeezing extra moisture out of the air during the cooling season and giving you control of your humidifier from one convenient location during heating.

Carrier's Infinity® Touch control is the key to an Infinity system with unprecedented utility and ease of use.

## Carbon Monoxide Alarm

Carrier® carbon monoxide alarms use sophisticated electronics and unmatched sensor technology to detect and record the levels of carbon monoxide (CO) circulating in your indoor air. You can monitor the current CO level in your home on a large, easy-to-read digital display. When dangerous levels of CO are present, a loud, audible alarm alerts you and your family automatically.

- Carbon monoxide is a colorless, odorless gas produced by incomplete combustion of fuels such as natural and LP gas, kerosene, coal, wood and charcoal. Any fuel burning device, including appliances, automobiles, and fireplaces can produce CO.
- Exposure to CO can cause fatigue, chest pains, impaired vision and coordination, headaches, dizziness, confusion, nausea, and can even be fatal.
- Every year, there are more than 2,000 fatalities in the United States from CO produced by improperly installed or maintained fuel-burning appliances.
- Carrier recommends placing a carbon monoxide alarm on each level of the house and in every bedroom.
- The carbon monoxide alarm's peak level memory allows health care professionals to quickly assess the level of exposure in the event of an alarm.
- A rechargeable lithium ion battery ensures continued detection and warning even during a power outage.
- For peace of mind, you can check to see if your CO alarm is functioning properly with the simple push of a button.

## Turn to the Experts

Willis Carrier invented air conditioning in 1902. Over 100 years later, we're proud to say Carrier® systems are trusted in more homes than any other brand.

Carrier continues to be on the forefront of innovative engineering and unsurpassed standards of excellence. So when choosing a home comfort system, you'll want to turn to the experts. Your Carrier dealer will evaluate your home, such as window placement and size, ductwork, other structural specifics and lifestyle to provide a customized indoor comfort plan designed specifically for you. And when you have an expert helping you make an educated decision, you're going to feel more comfortable.
